So where's the list of questions? Am I missing an attachment? Hopefully nothing you couldn't handle.

Best regards,

Burt Shephard

Thanks

Here's a list of questions that came up last night - I highlighted the Eco questions - we kept things pretty general but would be interested in your thoughts on these.

Chip,

LWG has not seen this slide. But its a compilation of information from Table 11-1 of the BERA and maps of contaminant extent in the BERA and RI. So it was compiled solely from information in LWG produced documents.

thanks Burt - this is a good summary. Was this from the risk assessment or if not has the LWG (John Toll or others) seen this?

Chip,

I've added a third slide that summarizes the risks for PCB, total DDx, copper, TBT and PAHs. Gives the sitewide maximum HQ, the medium in which the maximum HQ occurred, and the river miles within the site with the greatest ecological risks for these 5 chemicals. Also points out there are 86 other chemicals with HQ > 1, and 47 other chemicals whose ecological risks could not be quantified.
